- Total Chemical Inventory Management
- More Standard Features
- Powerful Reports
- Container Labels
- Binder Creation, Updating & Editing
- Easily Archive Outdated SDSs
- Author New SDSs
- Import & Export Information
- System Requirements

Internet Downloads

Leverage the power of the internet with SDSpro Classic by importing your SDSs directly from the manufacturer...at NO CHARGE!

- Locate the SDS you need on the manufacturer's web site
- Import it into SDSpro and add the needed product data

Automatic SDS Updates at No Charge

Easy access to SDS updates at the touch of a button. Eliminate the challenge of updating and maintaining your SDSs

- Update your SDSs 24-7-365 for free
- Click the update from internet button and instantly capture the most current SDSs available
- Archive old SDSs for "Cradle to Grave" OSHA and WHMIS compliance

Total Chemical Inventory Management

- Track and report chemical details and locations (unlimited)
- Produce the SARA Title III/Tier 2 report automatically
- Track chemical quantities and thresholds (TPQs)
- Barcode scanning for updated chemical inventories
- Instantly generate multiple chemical inventory reports

Accurate tracking of chemical products by location, ingredients, weight percentages and regulatory flags helps keep your entire chemical inventory compliant, easier to update and faster to report.

More Standard Features

SDSpro Classic is loaded with more features than other programs out there.

- SDSpro is NOT modular and includes everything you need for EHS, OSHA, GHS & WHMIS compliance
- No extra charge for labels, reports, authoring or any other tool you need
- 100% upgradeable! Need your SDSs available on the company intranet?

Powerful Reports

Powerful reports put critical product, inventory and regulatory compliance data at your finger tips. Choose one of the many pre-built reports to quickly access your data.

- Product and inventory
- Chemical and ingredients
- Regulatory compliance

Create, save and export virtually any report you need with SDSpro's Custom Report Generator.

- Robust and easy to use
- Create custom reports from thousands of fields
- Export to Access, Crystal Reports, Excel and the most popular programs
- Take Control of your inventory

Container Labels (NFPA, HMIS, GHS, WHMIS & DOT)

Right-to-Know (RTK) label printing at no additional cost.

- NFPA-National Fire Protection Agency
- HMIS – Hazardous Material Identification System
- GHS – Global Harmonization System
- WHMIS – Workplace Hazardous Materials Information System
- DOT Shipping Labels – Department of Transportation

Print secondary container labels in various sizes from large containers down to small spray bottles.

Binder Creation, Updating & Editing

Creating binders for your employees is fast, simple and easy.

- Instantly generate binders by department or location
- Easily create electronic Multi-file (TOC w/links), PDF or paper binders of your SDSs
- Lists hazards, PPE, emergency contacts, summary sheets, synonyms, etc.
- Save binder on a CD, thumb drive, other electronic media or print your binders on paper
- Easily accessible via smartphone, tablet, PC or any portable computer for convenient electronic access

Classic

Version 7

Easily Archive Outdated SDSs

Simple and compliant SDS archiving with SDSpro Classic.

- Simply select the product no longer in use, click a button and they are instantly moved to the archive
- If the same product re-enters your inventory, just reverse the process and you are done!
- Meets the document retention requirement for “Cradle to Grave” OSHA and WHMIS compliance

Author New SDSs

Author your finished product SDSs quickly with SDSpro Classic and eliminate the frustration of authoring SDSs today.

- Professional USA HCS 2012 authoring template
- Powerful phrase library for easy “drag & drop” composition
- Includes drop down menus, pictograms and GHS phrases to assist with authoring
- PDF publishing, no Adobe® license required
- Customer tracking and SDS update tools
- SDS version control with global changes for mass updates

Import and Export Information

SDSpro Classic keeps your information flowing even outside of SDSpro's chemical inventory and SDS management.

- Information can be imported and “mapped” from existing spreadsheets and databases
- Data can be exported from SDSpro for use in reporting and other systems
- You own and control all your data and SDSs

System Requirements

Supported Operating Systems:

- Windows 10
- Windows 8
- Windows 7
- Windows Server 2012
- Windows Server 2008 R2

Recommended Hardware Requirements:

- Intel Core 2 Duo processor or equivalent
- 4 GB RAM (8GB Recommended)
- 1GB free hard drive space or as needed for data file growth
