

MOBILE DATA COLLECTOR (MDC)

www.SDSpro.com

FINALLY! An answer to the problem, “How do we inventory our chemicals quickly and efficiently?”

The Requirement:

A current chemical inventory is the foundation of an employer’s compliance with its Hazard Communication program and Right-to-Know requirements.

The Need:

- Identify all hazardous chemicals currently onsite
- Conduct a physical chemical inventory by location
- Identify those chemicals eligible for disposal
- Locate unauthorized chemicals throughout the facility
- Ensure SDSs are available for all identified chemicals

The Challenge:

Capturing and maintaining your company’s current chemical inventory is a challenge. The Hazard Communication Standard requires the employer to identify the physical locations of all hazardous chemical products used throughout its facility.

The Solution:

The *SDSpro* Mobile Data Collector (MDC) is a lightweight portable inventory capture device. Use the MDC to move throughout your facility and QUICKLY capture and record chemical names, manufacturer information, physical locations and barcode IDs, when available. Record chemical container sizes and quantities too!

The Details:

The MDC uses a special version of the *SDSpro* software application, so existing *SDSpro* users will be familiar with the MDC screen. Set up physical locations prior to conducting the inventory and/or add them as you go. Simply select the physical location (typically a storage room) and begin your physical chemical audit!

Mobile Data Collector Hardware Specifications:

- *SDSpro* UltraMobile Software
- Fujitsu *STYLISTIC Q508* Tablet PC*
- 10.1" TFT display touch screen
- 4 GB SDRAM Memory
- 128 GB Hard Drive
- Microsoft Windows 10
- 1 Year Manufacturer’s Warranty
- 1D Laser Barcode Scanner
- Up to 10.5 hour battery Life
- Carrying case and stylus

Features and equipment are based on availability and subject to change without notice.

Mobile Data Collector Software Details:

- Designed for small screen interface
- Extra large font for enhanced viewing
- Search by Bar Code, Product Name, Part Number, Manufacturer Name
- Manufacturer Name type-ahead capability when adding a Product
- Syncs with *SDSpro* for direct updates to chemical inventory
- Bar code at the Product and Container level
- Track SARA Tier II container information (Quantity, Size, Units, Type, Pressure and Temperature)
